# PREFACE

The Supported Employment, Parents, Transition and Technical Assistance (SEPT/TA) Project is a national project located at PACER Center and is funded by the U.S. Office of Special Education and Rehabilitation Services (OSERS) through a subcontract of the Technical Assistance to Parent Programs (TAPP) Project. SEPT/TA delivers technical assistance to parent training and information centers which are developing and implementing parent training about supported employment and transition. In addition, the SEPT/TA Project facilitates the national exchange of information to promote parent training about supported employment, transition and those areas relating to the independence of youth and young adults with disabilities.

Supported Employment and Transition Resources is an annotated bibliography of journal articles, manuscripts, books and audiovisual materials. This manual is intended to provide you with current information on resources available for parent training about supported employment and transition. The SEPT/TA Project does not endorse the materials listed. Due to frequent changes, specific prices for materials are not listed. Please contact the individual programs for information regarding ordering and costs. We encourage you to examine the items that will be effective for the development of training in your communities.

# Motivation makes the difference

*Moving from sheltered employment to working in a wilderness area doing dangerous tasks seems like an impossibility. But with strong motivation, a supportive job coach, and support from co-workers and the community, even the impossible sometimes does occur.*

By Mike Kelly

Jim is 24 years old and worked in sheltered employment for about four years. He was happy working in recycling and thrift store businesses, but eventually wanted other types of work.

Money wasn't the primary motive, and neither was the peer pressure, although both were indeed motivating factors. The primary motivator was Jim's and his parents' desire to find a niche in the forest service industry.

Jim's father had been a logger and his mother a camp cook. Family friends were also in the forest and logging industry. This was Jim's world. He simply wanted to be like the others who were important to him.

A job was developed for Jim with the U.S. Forest Service, one of the largest employers in our rural valley area and one of the most sought-after employers as well.

Jim's new job involved constructing and maintaining trails designed for hikers and packers. Tasks included tree cutting, brush clearing, and bridge building.

To get to work, Jim had to be driven on mountain roads to a ranger station 95 miles from home, hike into the wilderness area 21 miles on foot, and set up camp for 10 days. His initial training was very intensive — including survival lessons as well as on-the-job training.

But the most critical thing for Jim to learn was his relationship with his fellow employees after the work day was finished. You don't live in the forest successfully for 10 days at a time with a group of men and women without knowing your roles and responsibilities.

This became Jim's community. He had to learn what part he played as a member. The employment specialist who coached Jim, and his co-workers, were vital components of this job. The employment specialist stayed with Jim for the first three weeks, day and night.

Eventually these supports were cut back to short one- to two-day visits at the beginning and end of each 10-day shift. Radio contact became the day-to-day method of communicating.

Learning the pulse of the community took much effort. Often camp responsibilities were very subtle; unwritten rules were the norm. Each person was interdependent on the others, and Jim was no exception. If he was to receive supports from his co-workers, then he had to meet some of their needs as well. The job coach became the link in this learning process.

The work season quickly came to an end, and the Forest Service retained Jim as a permanent employee. The Forest Service values Jim for his contribution as a member of its team. One of his co-workers was overheard to say, "Now we are making steps toward truly being a diverse work force."

Jim has become a new man. He is a much more independent, self-directed, and outspoken individual than the one who first entered the forest.

# Career explorations: Finding enjoyable work

By Marion Thayer

Our daughter, Amy, graduated from high school special education classes in 1988. It was a proud and happy moment for our family and friends as Amy, who has Down syndrome, marched up to receive her diploma. But no one was more proud or happy than the graduate herself.

Amy's career exploration began during her high school years as part of her educational program. This process involved several individuals — educators, potential employers, and our family. Her explorations included folding laundry in a nursing home, dishwashing at a local restaurant, and housekeeping at a hotel.

None of these endeavors proved particularly successful, mostly because Amy did not enjoy the work. In one situation, she became too stressed from imposed time limits.

Through trial and error, she was in time placed at her present job site. She has been a busperson at Fuddruckers, a popular hamburger restaurant, for four years. Overall, this has been a most successful experience for her. She has made friends and has a good relationship with her present manager.

One of the downsides of this job has been the seemingly rapid turnover of managers. Each manager comes with a slightly different perspective and expectations. This means a new adjustment for Amy.

Some managers are better able than others to relate to an individual with a disability. There have been some difficult situations for Amy to deal with, but none of these situations was insurmountable. With the support of the service provider, and her social worker, problems were eventually resolved.

Amy is very happy in her present employment and has gained independence, self-esteem, and the satisfaction of a job well done. There are other rewards as well. Her manager is generous with encouragement and praise. Furthermore, Amy looks forward to receiving a paycheck every two weeks. She keeps her own checkbook with some help from her father or me. She enjoys being able to purchase gifts for family and friends and to buy new clothing and furnishings for her room. Her salary also permits her to enjoy many social and recreational activities.

She is becoming a more responsible adult, and supported employment has helped her achieve this goal.

*"Finding the right job is not easy. What works for one person may be completely wrong for another. Sometimes it takes some trial and error before finding one's niche."*

Because of the benefits to everyone involved, I would like to see more employers opening their doors to individuals with developmental disabilities. I feel that opportunities are far too limited.

I strongly believe that more creative and innovative career placements are needed. A broader job market needs to be developed so ALL individuals with a disability will be given the opportunity to realize employment on a community job site side-by-side with typical employees. This is my hope for the future.

## **Career Planning Begins at Home**

Parents can improve the employment opportunities for their sons or daughters with severe disabilities by teaching them such job-related behaviors as:

- Asking for help when a task is difficult.
- Knowing how to return to a job after a break and finish a job.
- Knowing how to participate in a team effort.
- Accepting directions and corrections when doing a job.

Parents also can improve the employment opportunities of their sons or daughters by:

- Establishing a career

planning team that involves the student and the people who know her or him in a range of settings.

- Identifying the student's marketable skills and her or his likes and dislikes.
- Making sure the student has a resume and letters of reference.
- Providing job leads to school personnel and adult service providers.

# Determined to make one's own decisions

by Donna Stuntebeck  
Special Needs Staff  
Hibbing Technical College

In June 1991, Mary Paschke graduated from Chisholm High School. In September, she began her second year of training in the Culinary Arts program at the Hibbing Technical College (HTC).

How this came about is the story of one student's determination to train for an occupation, a family's ability to access choices, and an educational system's efforts to provide for the special needs of a student. The story also is a history of transition from secondary school to post-secondary training.

Mary's story began in the 11th grade. Her work experience facilitator, Tom Eidel, had the idea of taking a group of students with disabilities into a work situation at the Hibbing Technical College. He contacted HTC Special Needs Coordinator Donna Stuntebeck, and together they approached Larry Paskvan, the culinary arts program leader who supported the idea.

Together, these three planned a work situation for two groups of students who would work at HTC in warewashing (washing dishes, silverware, etc. using automated equipment and sanitary methods). Mary would be in one of the groups.

Through this work experience, the students with disabilities would have an opportunity to be with students their own age in a compatible, integrated setting. While learning job skills, they would get a taste of the post secondary training environment. School and district administrators approved the idea, and so Mary came to HTC.

Mary spent two hours of each day that first year at HTC, learning warewashing skills (dish and silverware washing), demonstrating that she is a productive and responsible worker, and interacting with HTC students. She commuted by bus from Chisholm each day.

At home, she began to discuss with her parents the possibility of occupational training. Mary's parents, Wes and Bunny Paschke, realized the need for Mary to plan for her future, knowing that the time had come for Mary to begin the process of breaking away and entering adulthood. If she was really interested in the food service occupation, they wanted her to exercise her options to do so.

*“Personal contact was also very important; much more so than with many of the other students. Talking and visiting often became an educational tool.”*

One choice they considered was Minnesota’s Post Secondary Education Option. After investigation, Mary and her parents decided to go this route Mary’s senior year in High School. In the spring, the necessary papers were filed and Mary enrolled in the Culinary Arts program at HTC. Under this option, Mary would be a senior at Chisholm High School but would attend classes at HTC.

To make this transition to HTC, careful planning and cooperation were needed among parents, Mary, and personnel at both Chisholm High School and HTC. Staffings were held and expectations of all those concerned were discussed.

An individualized training plan was written to address Mary’s needs at both secondary and post-secondary levels. Once training began, periodic staffings were held to evaluate progress and make adjustments. Mary always contributed, along with a parent, special needs and counseling staff from HTC, and one of Mary’s high school teachers. Problems were addressed with openness, and solutions attempted, most often with success.

One of the problems addressed was one that most post-secondary students experience — that of being at a new place, trying to make new friends with that wonderful sense of being “on one’s own” but at the same time having to abide by a schedule and make decisions. It is usually not an easy task, and it didn’t prove to be easy for Mary. Part of her heart was also still at the high school, along with her friends. One solution was to encourage participation in high school activities. Those contacts were still important.

Mary also required extra time and attention at tasks, and it was necessary for her instructors to adjust their teaching methods for Mary’s learning style. All needed to

cooperate, to keep a sense of humor and to have a supportive attitude. We were all covering new educational ground. If something didn’t work, we needed to try again.

That year passed and problems were addressed as they emerged. The assistance of Mary’s high school teacher and work experience coordinator was absolutely essential as was the interest and perseverance of her parents.

It was decided that Mary would spend as much time as needed to learn a skill and that she would be evaluated in skill areas, using a checklist of performances. Extra care needed to be taken so that she was not “lost in the crowd” but rather kept focused on the job at hand.

This was not always easy. Mary often felt lost, not needed, and each time this happened, we all had to recoup and try another approach.

We found, for example, that a more structured approach than we had anticipated was needed so that Mary would feel secure in knowing what was expected of her. We had to work harder at communicating our expectations effectively at her level. We needed to make potential choices open to her but also needed to provide extra guidance so Mary could make good choices.

Personal contact was also very important; much more so than with many of the other students. Talking and visiting often became an educational tool.

Toward the end of the year, a final IEP meeting was held and Mary expressed her desire to be a full-time student at HTC. She enrolled for 16 Culinary Arts credits. She will have the added assistance of a tutor, and her instructors will once again work with a list of

performance objectives. She has already had her first staffing and continues to communicate what she wants to do with her life.

One of the benefits of training and independence has been Mary's new found ability to advocate for herself. This needs to be further developed, but for now, she has a plan and knows the steps necessary to accomplish this plan. As the year progresses, she will be one step further toward that final educational transition — looking for and acquiring a job.

Her team of supporters — parents, teachers, special needs and counseling staff — are ready to help her toward her goals. But most of all, Mary is ready to participate in making her own life's choices.

This indeed has been the ultimate goal of the whole experience, assisting and encouraging Mary to exercise that important skill that all adults need — decision-making. It is this skill that will empower Mary to become an independent adult.

# Christopher's Journey

Recreation is also a vital piece to sound transition planning. At our local YMCA, Christopher is learning about fitness and exercise, making friends, and being supported by the coach, just as any other member who attends.

What we want is for Christopher to be fully prepared for his future through collaboration and support in a variety of different ways. Every member of his circle has made a commitment to Christopher to ensure his successful transition into adult life. Christopher is becoming a self advocate and has taken a leadership role in the planning and coordination of his own activities.

## Positive Student Profile

Preparing a Positive Student Profile of your son or daughter is a way of taking an active role in the transition planning process. Parents have valuable information to share about the gifts, talents and strengths of their child, yet others may not be aware of these strengths. The Positive Student Profile is one possible vehicle for the family's input. Transition from school to adult life is the most critical time for individualized planning. Each student has unique hopes and dreams and the supports necessary to realize these dreams are just as unique.

Some of Christopher's transition opportunities include the following:

- Volunteers at the local "Y" day care center
- Participates in the Employment Orientation Class
- Develops photographs
- Enters data into the computer
- Uses computer engraver

By Lucinda Gabri

## A Circle of Friends

In the summer of 1993 we began a Circle of Friends for my son Christopher, with people he selected, for the purposes of helping him to realize some of the dreams he shared with us.

He began by telling us that he wants to work with children, and we strategized on how he could have an experience incorporated into his school program to enable that to happen.

The high school where Christopher attends has a day care center. The transition coordinator for the district arranged for Christopher to meet the coordinator of the day care. Within a week, Christopher was working in the day care program one period per week.

He loves the children clamoring for his attention.

The day care coordinator also felt Christopher should have the opportunity to participate in the curriculum portion of the program which instructs students on proper care for children. He began taking this class, with modifications around the curriculum.

- Collates materials
- Bikes into the community with his neighbor to learn bike safety & how to access his barber, his favorite video store, yogurt shop and the local pizza parlor
- Works out at the YMCA, with the help of natural supports and calls for a ride home when done
- Has a 'Circle of Friends' to support his current and future wishes and goals.

Some of Christopher's individual school transition opportunities for the 1994-1995 school year will include:

- Christopher will be included at Union Township High School and will attend the resource center for math & reading. He is also looking forward to taking 'shop' classes, a conversational Spanish class and participating in home economic classes.
- Christopher will participate in the classroom curriculum, with modification to enhance his abilities to work with children.
- Christopher will participate in the regular physical education program.
- Christopher will be involved in the Shop Rite Supermarket program.
- Christopher will have as his additional work experience some office duties and he will continue to volunteer in the 'Y' daycare center.

Christopher will have a circle of peer supports built around him to initially guide him through the school building and help him locate his classes. In addition the peer supports will provide a natural support network, helping him develop friendships among other students, providing support in the classroom, helping him to expand and enhance his opportunities for participation in extracurricular activities.

It is our hope that by utilizing a Circle of Friends and the Positive Student Profile, Christopher will be able to realize his dreams. We all wish Christopher a successful journey.

# Jim Benson's Journey from Family Home to a Home of His Own

*By His Father*

Our son Jim lived in our St. Paul, Minnesota, home for twenty-five years. As we grew older and Jim became an adult, it became apparent that we should seek a stable residence he could call home and that would remain his home after we are gone. In our first attempt to meet these goals, Jim moved into a small community group home. He lived there for four years. During the fourth year, he experienced severe injuries that forced him to undergo several operations on his hip; subsequently he spent three years in a nursing home. We searched for a new home for Jim during his stay in the nursing home but the search was made difficult because the state of Minnesota had declared a moratorium on building new group homes. Existing group homes had waiting lists that stretched out to years. In reality it was because there were no other options, that we began working closely with advocacy organizations and our local government to find a path enabling Jim to live in a home of his own.

Each step of the process was filled with uncertainties. The process was not only new to us, but, also, to almost everyone else. Funding had to be found for support services, household expenses, and real estate

costs. There were complex questions about possible roommates and about their opportunities for control over their home if, in fact, Jim was the landlord. Related issues that were new to us put us on hold until the county reached a decision. Finally, with county approvals, we looked at over fifty properties before finding Jim's new house.

At this point, we naively thought our problems were behind us. Our first disillusionment appeared when it became apparent that the organization that provided staff for the home viewed it as just another group home in which they made the decisions and didn't share information with us as a family - we were an integral part of Jim's life and support team. We felt that they considered their staff's stability more important than Jim's welfare or quality of life. In time, we concluded that the agency or its staff was incompetent and, with the county's approval, severed relations with this agency. Looking back, we see the delicate relationship and demanding expectations one holds for an agency when you expect assistance in making a house a home.

The second organization we selected improved the care and support given and was more open to sharing information with us as a family and members of the team. Things went well for a year. However, as this organization experienced substantial growth, it resulted in layers of supervisory administration. Along with this we felt that the understanding of Jim's needs as well as those of the "home" were so filtered that support, care, and mutual understanding suffered greatly. And so two years after starting with the second provider, we changed to a third, the current provider of staff. This time we chose a much smaller organization. Right from the start, they showed competence and real understanding of the young people residing in the home. More than three years have passed and we are very grateful each day for the association that we've established and fostered with this organization.

## A Guidebook on Consumer Controlled Housing for Minnesotans with

**Developmental Disabilities**, a joint publication of ARC Minnesota and the Research and Training Center on Residential Services and Community Living, ©1995.

To obtain copies, contact the Publications Office, Institute on Community Integration, University of Minnesota, 109 Pattee Hall, 150 Pillsbury Drive SE, Minneapolis, MN 55455, (612) 624-4512, available in alternative formats upon request.

Jim has learned to relax and enjoy a sense of joy and serenity in his own home. He needs and enjoys his space and has it now. The lawn gives him a view from the living-room window. The roomy backyard offers peace with the beauty of flowers, trees, and bushes. Staff initiative has created activities of interest and "therapy" by building a walking platform, a trampoline routine, arm pulleys, even a floor-crawling exercise. There are close human working relationships among all members of the team, including his doctors, staff at Jim's home, staff at the developmental activity center, the county social worker, and his family. Jim has grown through interactions with peers in the community, working, and going to the circus, musicals, and dances. Above all, he has close ties with his family; he visits at our house every weekend just as we feel welcome to visit him at his house. The care of his neighbors, family, and provider agency with dedicated staff, give us reason to believe that Jim will grow socially and achieve his full potential as a community member in the years to come.

For family members who wish to sustain an active commitment and contribution to the lives of their adult children after they leave home, helping them secure homes of their own not only permits but *demands* it. The energy and dedication this requires shouldn't be underestimated, but neither should the rewards.

Permission was granted to reprint from **A Guidebook on Consumer Controlled Housing for Minnesotans with Developmental Disabilities**, a joint publication of ARC Minnesota and The Research and Training Center on Residential Services and Community Living, *Institute on Community Integration* (UAP).
